

SOLUCIONES TÉCNICAS Y CONSEJOS PARA EL ENGRASE INDUSTRIAL

MICRO-PUMP

Our micro-pumps allow calibrated, mist-free, clean and economical lubrication by spraying a minimal quantity of lubricant in the following sectors: Chain lubrication, Felt lubrication (e.g.: roller oilers) Droplet lubrication machining, turning and tapping, lubricant deposit.
We offer a complete solution according to your needs.

RÀD AND SPRAY CONTROL

We propose fully or semi-automated devices to oil sheet metal, disc and coil or specific processes, able to spray all kind of viscosity from 1mm up to 3000mm, thanks to our Unirail® system, our fittings are long lasting and resistant.

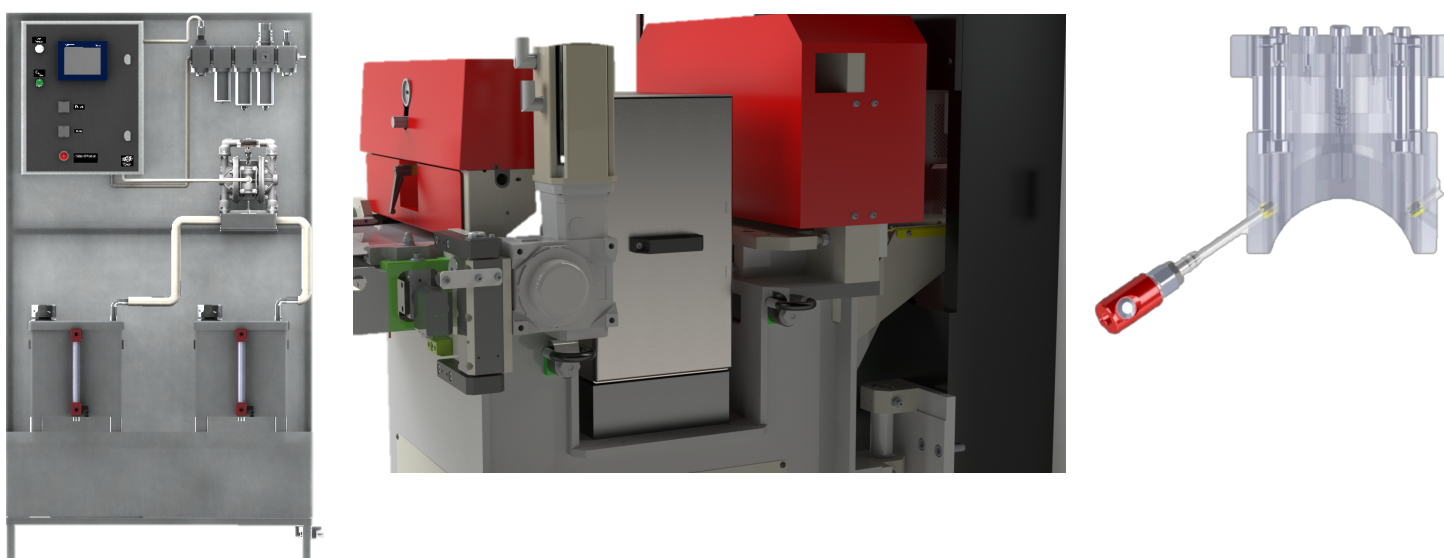

In addition, we offer Lubspot®, an extra lubrication which targets specific tool areas.

SPRAYBOX

Sprays as you want with high transfer rate (97%) of lubricant, Spraybox® targets areas that you need to lubricate with an extreme reactivity (2ms). Spraybox® can spray width up to 500mm. Maximum viscosity : 500mm²/s, Spraybox® ensures clean, accurate and repeated work.

ENGINEERING AND SERVICES

We design our spray units according to your needs.
We customize our automat program for each business.
We guarantee the mechanical and electrical fittings of our devices and maintain them at our customer's plant or remotely.
